Products from the Chips range are made from barrel quality oak coming from the stave mill belonging to the RADOUX group. All the products are packed in 10 kilo polyethylene aluminum bags. Upon request, granulates can be packed in 10 kilo mesh bags for an **additional cost of 0.20 € per kilo**.

All the products are packed in 20 kilo carton boxes, ie 2 x 10 kilo bags, with the exception of Nektar Fresh, which is packed in pallet boxes of 300 kilos.

NEKTAR FRESH is dehydrated with Spirajoule and sterilized in the roaster at 130°C, but is not toasted.

All the toasted products (granulates and chips) are dehydrated with Spirajoule then toasted at temperatures adapted to the level of toast required.

Products from the Staves range are made from barrel quality oak wood coming from the stave mills which are partners of the Radoux cooperage.

STAVES ESSENTIELLE, EXCELLENCE, NEKTAR PURE and EXTREME: 960x47x7mm

Contact surface 0.105 m² – 9.50 STAVES / m² – 1 STAVE = +/- 0.20 Kg.

Packed in carton boxes of 100 staves in a watertight bag with outer carton.

STAVES XL : 960x65x12mm – Contact surface 0.150 m² – 6.60 STAVES / m² – 1 STAVE = +/- 0.40 Kg.

Packed in carton boxes of 40 units in a watertight bag with outer carton.

STAVES EXCLUSIVE : 960x47x17mm – Contact surface 0.125 m² – 8.00 STAVES / m² – 1 STAVE = +/- 0.50 Kg.

Packed in carton boxes of 40 units in a watertight bag with outer carton.

All our staves are toasted in a convective system oven, according to the toasting profiles developed by PRONEKTAR's R&D department.
